

Learning objectives:

1. General review of the home parenteral nutrition patient
2. Discuss common home PN diagnosis
3. Review insurance criteria for home PN coverage
4. Review of safety concerns for the home PN patient

Description:

What happens to your hospital PN patient after discharge? Are all hospital PN patients candidates for home nutrition support? Learn about the home parenteral nutrition patient in this dynamic presentation. This presentation will provide an overview of home nutrition support, why it differs from the hospital setting, what the criteria are for insurance coverage as well as tips you, the clinical RD, can provide to help make the discharge to home safe and successful.

Lori Dixon, MS, RD
